#### Description

With help of the Grid view wizzard I have inserted a 100 digit colNumber. After setting the focus to the name input field, colNumber has changed to 1,2345678901234567e+99

I think it's better to limit this input field to 5 or 10 digits.

(issue imported from #M17424)

#### History

##### #1 - 2011-02-01 10:55 - Sigfried Arnold

The database field is set to TINYINT - so it can store values form 0 to 255 as unsigend integer (TINYINT). The value also is limited to 3 decimal digits.

There is no use limiting it to 5 oder even 10 digits - 3 is enough.

Though it would be better to validate for a range from 0 to  $(2^8)-1$ .

##### #2 - 2014-01-27 16:14 - Alexander Opitz

- Status changed from New to Needs Feedback

- Target version deleted (0)

- Is Regression set to No

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.1.7)?
