Description

Hi,

Just updated to 4.5.2 from 4.5.1 and the following PHP error occurs when I'm trying to retrieve/update extensions from remote repository

[28-Feb-2011 09:08:40] PHP Fatal error: t3lib_div::require_once() [function.require]: Failed opening required '/var/www/Bouvines/typo3/sysext/em/classes/exception/class.tx_em_mirrorxml_exception.php' (include_path='.:/usr/share/php5:/usr/share/php5/PEAR') in /var/www/COMMON/typo3_src-4.5.2/t3lib/class.t3lib_div.php on line 5477

Also I got and error message in the backend (see the attachment).

Note : The problem doesn't occur on introduction package updated with the 4.5.2 source files.
(issue imported from #M17795)

History

#1 - 2011-02-28 11:41 - RVVN no-lastname-given

I also noticed that "Extension Manager Improvements" projet doesn't not appear anymore on the forge website. Why ?

#2 - 2011-02-28 12:02 - Steffen Kamper

fix is committed as follow-up to [#25153](#25153)

For forge issue tracker: read the release notes ;)

#3 - 2011-02-28 12:42 - RVVN no-lastname-given

Thanks Steffen, I skipped the release notes indeed :)

Regarding this bug, shouldn't it be fixed in 4.5.2 ?
Apparently it's not the same as 0017735 cause a file is missing in this case, not a class ^^

#4 - 2011-02-28 12:57 - Steffen Kamper

it's committed and will appear in 4.5.3 - try to test with svn.
You can checkout svn locally and save em as extension, use it locally in your other project for test
