Description	
i get the following js error when i install several extensions that are depending on each other: parent.TYPO3.EM.Tools is undefined	
Steps to reproduce:	
- use old extension manager	
- uninstall extbase and fluid if installed before.	
- install fluid. fluid requires extbase to be installed. install extbase. another popup windows opens. after installing extbase, the window shoule be closeable via "Close window." but that is not possible.

- Status changed from Accepted to Closed
- Is Regression set to No

Never got such issue on 4.5. For 6.2 the EM was rewritten, so closing this issue.

If you think that this is the wrong decision or experience this issue again, then please write to the mailing list typo3.teams.bugs with issue number and an explanation or open a new ticket and add a relation to this ticket number.
