TYPO3.Fluid - Bug #25695

Template of widgets can't be changed

2011-04-01 11:19 - Georg Ringer

Status:	Closed		**Start date:**	2011-04-01
Priority:	Must have		**Due date:**	
Assignee:	Christian Müller		**% Done:**	20%
Category:	Widgets		**Estimated time:**	0.00 hour
Target version:				
Has patch:	No			

Description
Currently the widgets use the default template path only and it is impossible to override those which is kind of a nogo.

Attached patch fixes this. The path can be set via TS. e.g.

```
plugin.tx_fo.view.widgetRootPath = fileadmin/fo/
```

If using the pagination widget, the index.html needs to be at fileadmin/fo/ViewHelpers/Widget/Paginate/Index.html

One open question: Is this the correct way to go with the part "ViewHelpers" inside this path? or should it be fileadmin/fo/Paginate/Index.html?

+1 on this :-)

#3 - 2012-03-07 16:50 - Karsten Dambekalns

- Category set to Widgets

- Status changed from New to Needs Feedback

- Assignee set to Christian Müller

- Has patch set to No

Christian, are you working on this?

#4 - 2012-03-19 20:19 - Christopher Hlubek

I think we won't have a fileadmin folder in FLOW3 and I also dislike the idea of putting templates inside a fileadmin folder.

It should be possible to override this using settings (or TypoScript in v4). Right now the core widgets are cool but pretty useless.

#5 - 2012-03-19 20:21 - Georg Ringer

IMO this has been resolved with #10823
can you please crosscheck, thx

#6 - 2012-09-20 10:58 - Adrian Föder

- Status changed from Needs Feedback to Closed

to me, everything looks like this is already resolved or handled in the related issues. Thus, closing it.
