

TYPO3.Flow - Task #25802

Add notion of "internal request arguments"

2011-04-06 17:08 - Bastian Waidelich

Status:	Resolved	Start date:	2011-04-06
Priority:	Should have	Due date:	
Assignee:	Sebastian Kurfuerst	% Done:	100%
Category:	MVC	Estimated time:	0.00 hour
Target version:	1.0 beta 1	Has patch:	
Sprint:		Complexity:	
PHP Version:			
Description			
The referrer fields that Fluid adds to all forms currently end up in the target request and thus in the form action of the next form. Request arguments that start with two underscores should be "framework internal". Request::getArguments() should only return arguments that do not start with two underscores and we should add a non-API method Request::getReferrer() Request::getReferringRequest() that would build a request object on the fly.

Note: not only arguments starting with two underscores should be handled "internal", also arguments starting with "@". The check in the Router lines 169ff (<http://git.typo3.org/FLOW3/Packages/FLOW3.git?a=blob:f=Classes/MVC/Web/Routing/Router.php:h=e90dfce9ea2362f2166348d279ea695e876daf2e;hb=HEAD#l169>) could then be moved to the request. But we'll have to take care to keep the current override behavior (see Router::route()).
