Hi Stephan,

are you sure?

I think that the name of the doctype was changed:

In 4.4 it is html_5, in 4.5 and newer it is html5.

So having "html5" in 4.5 is correct.

See [#24545](#).

Hi Christopher!

Yes, you are absolutely right, we just figured it out with two different TYPO3 versions. Closing the issue...
