

TYPO3.Flow - Feature #2603

Implement magic findBy*() and findOneBy*() methods in the base repository

2009-02-10 18:34 - Robert Lemke

Status: Resolved	Start date: 2009-02-10
Priority: Must have	Due date:

Target version: 1.0 alpha 1	Complexity:
PHP Version:	
Has patch:	

Description

The base Repository should provide some magic __call() method taking care of findBy*() and findOneBy*() method calls, returning the results of searches for a property called after the method:

```
$result1 = $repository->findByFoo('bar');  
$result2 = $repository->findOneByFoo('bar');
```

\$result1 will contain an array of all objects whose property 'foo' is 'bar'.
\$result2 will contain the first object which matches a search for 'foo' == 'bar'.
