<b>Has patch:</b>			

#### Description

Since Doctrine2 integration i had the following error if i will store a Resource

```
#1: Catchable Fatal Error: Object of class F3\FLOW3\Resource\Resource could not be converted to string in /FLOW3/Packages/Framework/FLOW3/Resources/PHP/Doctrine/DBAL/Statement.php line 98 (More information)
```

For example:

```
$flagResource = $this->resourceManager->importResource('resource://Tutorials/Public/Images/Icons/Germany.png');
```

```
$languageModel = $this->objectManager->create('F3\Tutorials\Domain\Model\Language');  
$languageModel->setName('German');  
$languageModel->setOriginalResource($flagResource);  
$this->languageRepository->add($languageModel);
```

Its strange, because F3\FLOW3\Resource\Resource is an entity and not an valueobject thats need a `__toString` method

#### History

##### #1 - 2011-04-23 15:51 - Julian Kleinhans

hum i think the way i go is not correct.. will check it later again

##### #2 - 2011-04-27 13:51 - Karsten Dambekalns

- Category changed from Resource to Persistence
- Status changed from New to Needs Feedback
- Assignee set to Karsten Dambekalns
- Priority changed from Must have to Should have
- Target version deleted (1.0 beta 1)

Show me your Language domain model code...

##### #3 - 2011-04-27 21:50 - Julian Kleinhans

Dont no why, but it works now.. close and thx

##### #4 - 2011-04-28 10:14 - Karsten Dambekalns

- Status changed from Needs Feedback to Closed
