TYPO3.Flow - Bug #26542

Autoincrement unique identifiers not working anymore

2011-05-01 23:15 - Martin Brüggemann

Status:	Resolved		**Start date:**	2011-05-01
Priority:	Must have		**Due date:**

Target version:	1.0 beta 1			
PHP Version:			**Complexity:**	
Has patch:				

Description

I used the @Id and @GeneratedValue properties as seen in the blog example package to have short urls with integer identifiers like /ticket/234 instead of FLOW3 standard resource identifiers. Unfortunately it dosn't work with relations.

```
Uncaught Exception in FLOW3 Column name `flow3_persistence_identifier` referenced for relation from F3\Guruhelp\Domain\Model\Message towards F3\Guruhelp\Domain\Model\Ticket does not exist. thrown in file Packages/Framework/FLOW3/Resources/PHP/Doctrine/ORM/Tools/SchemaTool.php in line 485
```

This is an example model

```php
<?php
declare(ENCODING = 'utf-8');
namespace F3\Guruhelp\Domain\Model;

/**
 * @scope prototype
 * @entity
 */
class Ticket {

    /**
     * @identity
     * This ID is only for the ORM.
     *
     * @var integer
     * @Id
     * @GeneratedValue
     */
    protected $id;

[...]

    /**
     * @var \F3\Guruhelp\Domain\Model\Project
     * @ManyToOne(inversedBy="tickets")
     */
    protected $project;

[...]
}
```

[FEATURE][BUGFIX] Calculate referenced column names from class code

When no referenced column names are given in a model, determine them by looking at properties annotated with @Id. If no property is found, then flow3_persistence_identifier is used, if one property is found, that is used.
