<b>Description</b>	
When previewing a page with slider, i have the live preview on top and the workspace view at the bottom. When i click on a link in the live frame, i get the preview of that page in the workspace instead of staying in the live website.

### History

#### #1 - 2011-05-12 18:36 - Oliver Hader

- *TYPO3 Version set to 4.5*

#### #2 - 2011-07-06 15:20 - Michael Klapper

At the moment we don't support surfing through the page during a preview.

Probalby we could disable link clicking in that mode.
