| The flickr badge uses td wraps around the images. Thus we need to wrap the whole thing in table/tr and adjust the CSS as needed. That still leaves an illegal span in the flickr HTML, but we can't really fix that. |                    |                        |            |
