

GSoC 2011: Static File Caching - Feature #27110

Major Feature # 26891 (New): Implement basic static file caching as new caching framework backend

Extend the urlfilecache for additional arguments

2011-05-28 13:54 - Oliver Hader

Status:	New	Start date:	2011-05-28
Priority:	Should have	Due date:

Category:		Estimated time:	0.00 hour
Target version:	Mid of term		

Description

There will be additional arguments that are required for processing with the semi-static file cache.

This could be

- GET parameters (\$_GET)
- basic set of TypoScript
- Frontend User List (see tslib_fe::\$gr_list - the "group list")

Thus, extend the existing urlfilecache to store and handle these additional things as well (e.g. in the filecache or maybe by using another cache in the database)
