Description

A hook has been forgotten in implementing the page tree in extjs!

checkout typo3/class.webpagetree.php lines 120-127:

```
// Call stats information hook
$stat = '';
if (is_array($GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['GLOBAL']['recStatInfoHooks']))    {
    $_params = array('pages',$row['uid']);
    foreach ($GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['GLOBAL']['recStatInfoHooks'] as $_funcRef)
    {
        $stat.=t3lib_div::callUserFunction($_funcRef,$_params,$this);
    }
}
```

this hook is used in existing extensions like l10nmanager and I wanna use it too ... the correct place to add it would be class.t3lib_tree_pagetree_commands.php at about ~330.
be aware to implement it without applying htmlspecialchars() to its content!
