

TYPO3.Flow - Task #27283

Handle @InheritanceType in a correct manner

2011-06-07 20:19 - Rens Admiraal

Status: Resolved	Start date: 2011-06-07
Priority: Should have	Due date:
Assignee: Karsten Dambekalns	% Done: 100%
Category: Persistence	Estimated time: 0.00 hour
Target version: 2.0 beta 1	Has patch: No
Sprint:	Complexity:
PHP Version:	
Description	
<p>If a model is extended the base class needs to be annotated with InheritanceType. Problem is that we don't know which classes will ever be extended, and Doctrine throws an error when the InheritanceType is set without discriminator map:</p> <p>Uncaught Exception in FLOW3 Entity class 'F3\FLOW3\Security\Account' is using inheritance but no discriminator map was defined. thrown in file .../ORM/Mapping/MappingException.php in line 202</p> <p>In such cases the annotation must be ignored by our annotation driver, or the InheritanceType should be set automagically if FLOW3 detects that a model is extended.</p> <p>Relates to: https://review.typo3.org/#change,2130</p>

[TASK] Handle InheritanceType annotation more robust

When specifying InheritanceType but no heirs exist, no longer an exception will be thrown. Instead inheritance will be disabled to allow specifying InheritanceType "for future use".

- Status changed from New to Accepted

- Assignee set to Karsten Dambekalns

- Target version set to 1.1

- Has patch set to No

#3 - 2012-04-30 11:41 - Karsten Dambekalns

This works for non-abstract base classes since the merge of <https://review.typo3.org/2277> (as the discriminator map is always defined).
