TYPO3 Core - Bug #27303

t3lib_BEfunc::blindUserNames might use wrong group list collection

Description

The mentioned method used to blind usernames that are not in a set of defined groups uses a wrong group collection.
The check is performed on the be_users field "usergroup_cached_list", this is fine for the current logged in user, however for any other user this might lead to wrong results. The reason is, that "usergroup_cached_list" is written when a user is logged in (see t3lib_userAuthGroup::fetchGroupData()).

Thus, if the groups of a user have been modified, the "usergroup_cached_list" will stay unmodified until the next login of the accordant user.

- Status changed from New to Needs Feedback

- Is Regression set to No

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.2.4)?
