

TYPO3 Flow Base Distribution - Bug #27332

Problems with declare(ENCODING = 'utf-8'); in file header

2011-06-09 22:12 - Tim Wagner

Status:	Resolved	Start date:	2011-06-09
Priority:	Could have	Due date:	
Assignee:	Karsten Dambekalns	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.0 beta 1		
Description			
On MAC OS X 10.6.7 with default PHP installation (no Ports) every time you call command ./flow3_dev or ./flow3 it leads to the following error:			
[09-Jun-2011 20:30:25] PHP Parse error: syntax error, unexpected '*', expecting ',' or ')' in /private/var/www/flow3/Packages/Framework/FLOW3/Scripts/flow3 on line 3			
The same error occurs when requesting the welcome page on the browser.			
After removing declare(ENCODING = 'utf-8'); from each files header FLOW3 works as expected.

#3 - 2011-06-11 01:39 - Karsten Dambekalns

Another update: you can have either line 1 or 3, but not both and it will work:

```
#!/usr/bin/env php
<?php
declare(ENCODING = 'utf-8');
```
