<b>PHP Version:</b>			
<b>Has patch:</b>	No		

#### Description

Actually in testing mode the database is cleared completely in static public function tearDownAfterClass() at the end of testing. You dont always want this behaviour, so please add a check in settings to enable this

#### History

- Status changed from New to Needs Feedback
- Has patch set to No

For me the current behaviour makes sense, as you want a cleanly defined state for the DB in testing. What would be a use-case against that?
