Description

Need the ability to hide all tables from list view.

You want to show only a specific table:
Today you would have to list all available tables except the one you want to be available.
With this patch, you can just set `hideTables = *` (or `hideTables := addToList(*)`) to hide all tables, and then set `hideTable = 0`, to show a specific table:

Example:

```
mod.web_list {
hideTables = *
table.tx_cal_event.hideTable = 0
}
```

Here only the table `tx_cal_event` is shown.
