

TYPO3.Fluid - Bug #27607

Make Fluid comparisons work when first element is STRING, second is NULL.

2011-06-21 06:45 - Sebastian Kurfuerst

Description

Taken from <https://review.typo3.org/#patch.unified.2824.2.Classes/Core/Parser/SyntaxTree/ViewHelperNode.php> :

I know it is not in the table on php.net, but the case " == NULL (\$operand1 being string and \$operand2 being NULL) should probably be comparable, too (and the PHP interpreter can of course compare them). What do you think?

I definitely agree, so we should implement this in Fluid v5 and provide tests for it, and then backport it.

This is basically a duplicate of [#26665](#), right? Then one of them should maybe be closed?
