Target version:	Early Bird Tickets		
Description			
Currently we're using the @Id annotation in the models Circular , IntermissionType , Location , Room and SessionType to mark the title/subject as identity. This leads to the fact that those can't be edited anymore (see #13324) The Id annotations should be removed so that FLOW3 introduces the flow3_persistence_identifier Note: To be able to migrate the database on the live server, a doctrine migration must be provided.

Revision 14069e27 - 2011-06-27 14:19 - Bastian Waidelich

[TASK] Remove @identity annotations from domain models

This change removes @Id annotation of the domain models IntermissionType, Location, Room and SessionType in order to make them editable.

The migration shipped with this creates UUIDs in the added columns, adjusts all relations as needed and updates the affected constraints.

Change-Id: Iff50f6ac0dcf272d9140e11e976d2bd0d41072e2
Resolves: #27629

History

#1 - 2011-06-21 19:45 - Mr. Hudson

Patch set 1 of change Iff50f6ac0dcf272d9140e11e976d2bd0d41072e2 has been pushed to the review server.
It is available at <http://review.typo3.org/2866>

- File *Version20110621193235.php* added
- Status changed from *New* to *Under Review*
- Assignee changed from *Bastian Waidelich* to *Karsten Dambekalns*

By changing the models as described above and calling `flow3_dev flow3:doctrine:migrationdiff` I get following exception:

```
Uncaught Exception in FLOW3 SQLSTATE[HY000]: General error: 1005 Can't create table 't3con11.#sql-3d4_ba' (err no: 150) thrown in file C:\Users\bwaidelich\HTDOCS\t3con11\Packages\Framework\FLOW3\Resources\PHP\Doctrine\DBAL\Connection.php in line 577
```

Doctrine creates a migration anyways (see attachment) but calling `flow3:doctrine:update` throws a similar exception:

```
Uncaught Exception in FLOW3 SQLSTATE[HY000]: General error: 1005 Can't create table 't3con11.#sql-3d4_ca' (err no: 150) thrown in file C:\Users\bwaidelich\HTDOCS\t3con11\Packages\Framework\FLOW3\Resources\PHP\Doctrine\DBAL\Connection.php in line 577
```

Caused by a foreign key constraint violation, can probably be solved by adjusting the migration. I'll check.

- % Done changed from 0 to 90

The change works now, but the down migration needs to be made working. I'm at it...
