

TYPO3.Flow - Bug #2765

request path is not correctly determined when FLOW3 isn't installed in webroot

2009-03-05 14:48 - Bastian Waidelich

Status:	Resolved	Start date:	2009-03-05
Priority:	Must have	Due date:	
Assignee:	Karsten Dambekalns	% Done:	100%
Category:	MVC	Estimated time:	0.00 hour
Target version:		Complexity:	
PHP Version:			
Has patch:			

Description

When FLOW3 is not installed in the htdocs root, it does not correctly determine the request path of the URI.

Example:

<http://localhost/flow3/Public/>

Instead of displaying the default view, FLOW3 tries to find the "Public"-Controller in the "flow3"-Package and throws a 404.

A temporary solution is to create a virtual host, so you can access FLOW3's root via

<http://flow3/> (or the like)
