

## TYPO3.Flow - Bug #27825

### TypeHandling should use the Collection interface as collection type

<b>Description</b> Only the following values are possible collection types that can have an element type annotation for children at the moment: <ul style="list-style-type: none"><li>• array</li><li>• \ArrayObject</li><li>• \SplObjectStorage</li><li>• \Doctrine\Common\Collections\ArrayCollection</li></ul> As a \Doctrine\Common\Collections\PersistentCollection is no \Doctrine\Common\Collections\ArrayCollection but implements the \Doctrine\Common\Collections\Collection interface as well, FLOW3 should use the Collection interface for determining if its a collection type.
