

Translation Team - Feature #28199

Setup of the new Translation Server

2011-07-14 13:57 - Dominique Feyer

Status:	Resolved	Start date:	2011-07-14
Priority:	Should have	Due date:	
Assignee:	Dominique Feyer	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Translation Server v2.0		
Description			
The future Translation Server will be based on Pootle, we need a new server to host this software. As Pootle need a lots of memory to work on bug project (lang, csh, ...), we need a server who can handle the load.			

History

#1 - 2011-07-14 14:01 - Dominique Feyer

- Target version set to Translation Server v2.0

#2 - 2011-07-14 14:03 - Dominique Feyer

- Assignee set to Dominique Feyer

#3 - 2011-07-14 14:05 - Dominique Feyer

Currently the server provided by the TYPO3 infrastructure is not powerful enough. As Michael is in holiday actually we decide to move the a more powerful server hosted by linode. This is a temporary solution to avoid delaying the project.

- Status changed from New to Needs Feedback

- % Done changed from 0 to 50

What to do next?

#5 - 2011-10-14 09:47 - Dominique Feyer

The setup run now nicely. I solve a memory leak issue last week, and yesterday I do some improvement in the MySQL configuration.

Next step is to move the "en" project to "templates" and the setup will be OK.
