i tried to reproduce it today even with 4.5.4 but was not able to do so. i have so many typo3 installations that i dont know which one was the one that had that problem. so i think until i don't find this problem again, you can just close this issue.

lets see if someone else comes up with that

Maybe you can still have a look at the code and (if possible) code some safeguard around it?

Hi,

so after 5 months, can we close this issue?

#9 - 2014-01-07 10:39 - Simon Schaufelberger

if it's not reproduceable at the moment, i think yes.
