Description			
Hello,			
I'm using TYPO3 4.5.5 and there seems to be a bug in the CachingFramework:			
While using the Cachingframework with FileBackend and the typoscript condition tcemain.clearCacheCmd= all, an error message is passed: "The temporary cache file "[snip]/typo3temp/cache/clear_hash/[snip]" could not be written.". The caching framework seems to try to change a cached hash file, that is already cleared.			
When changing the typoscript condition to "TCEMAIN.clearCacheCmd = pages" it works in Frontend, but can't clear - of course - cache hashes...			
A similar cache problem was reported for memcache in 2008 (http://bugs.typo3.org/view.php?id=9645)

History

#1 - 2011-08-30 23:04 - Steffen Gebert

- Priority changed from Must have to Should have
- Target version deleted (4.5.6)
- Complexity set to easy

#2 - 2011-08-31 11:22 - Andreas Wolf

- Category set to Caching

#3 - 2014-10-06 13:43 - Alexander Opitz

- Status changed from New to Needs Feedback
- Is Regression set to No

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.2.5)?

#4 - 2014-12-09 15:07 - Christian Kuhn

- Status changed from Needs Feedback to Closed

If this still happens in 4.5, it will not be fixed there anymore. For younger core versions, this issue should be solved already. For now, I'll close this issue.
