

TYPO3.Flow - Feature #29564

Change \TYPO3\FLOW3\Property\TypeConverter\DateTimeConverter in order to compose a DateTime property from two input fields

2011-09-08 12:32 - Andreas Keßler

Status:	Closed	Start date:	2011-09-08

Category:	Property	Estimated time:	0.00 hour
Target version:		Complexity:	
PHP Version:			
Has patch:	No		
Description			
It should be able to set one \DateTime property from two inputs			
<pre><input type="text" name="event[date][date]" value="{event.date -> f:format.date(format:'d.m.Y')}" /> <input type="text" name="event[date][time]" value="{event.date -> f:format.date(format:'H:i')}" /> <f:form.hidden name="event[date][dateFormat]" value="d.m.Y H:i" /></pre>			
The changes could be made in \TYPO3\FLOW3\Property\TypeConverter\DateTimeConverter:121 and could look like this			
<pre>\$time = ""; if(isset(\$source['time']) && is_string(\$source['time'])) { \$time = " ".\$source['time']; } \$dateAsString = \$source['date'].\$time; // original line 121</pre>
