Description

We must plan a possibility for extensions to influence the choice to refresh or not the Card Layout. My use case is the workspaces. In the current configuration, if you switch workspace while being - for example - in the List module, the view doesn't change, although you have changed workspace. This is quite troubling and makes for a very bad user experience IMO.

solution iterate over the modules and set uri to about:blank - should we have an API call for that?

- Priority changed from Must have to Should have

- Target version changed from 4.6.0-RC1 to 4.7.0

#3 - 2011-10-08 16:34 - Francois Suter

4.7? So what's the solution for 4.6? What Kay suggests? Is there a way to be sure that we are iterating over **all** modules? Is there an issue for the workspaces sysex to do this? If not I will have to disagree strongly with your change.

#4 - 2011-10-08 16:59 - Francois Suter

Sorry, I hadn't notice the revert.

#5 - 2012-02-16 06:52 - Stanislas Rolland

I think this is fixed in the new implementation of the card layout. Am I right?

#6 - 2012-03-05 17:51 - Steffen Ritter

- Status changed from New to Needs Feedback

- Target version deleted (4.7.0)

this is related to the "old card layout right"?
