Description

Try this: Open a Backend User record and try to use the little 'x' to clear the password field. The field is not cleared.

I pinned it down to the 'eval' => 'md5' configuration. Any fields with this md5-option (most likely password fields) will produce this error.

History

#1 - 2011-09-30 20:30 - Peter Niederlag

- Category set to DataHandler aka TCEmain
- Status changed from New to Accepted
- Priority changed from Should have to Could have
- Target version deleted (4.6.0-RC1)
- Estimated time set to 3.00 h
- Complexity set to medium

confirmed, however clearing the field wont make to much sense most time anyway.

Don't get your point. I think clearing the field is quite straight forward if you want to set a new password. Actually I came accross this bug because I clicked the button and nothing happened.

#3 - 2014-12-04 19:49 - Mathias Schreiber

- Status changed from Accepted to Resolved
- Is Regression set to No

works on 7

#4 - 2018-10-02 12:19 - Benni Mack

- Status changed from Resolved to Closed
