

TYPO3 Core - Feature #30594

Allow packages to be signed

2011-10-06 07:14 - Stefan Neufeind

Status:	Closed	Start date:	2011-10-06
Priority:	Should have	Due date:	
Assignee:		% Done:	0%
Category:	Extension Manager	Estimated time:	0.00 hour
Target version:	7.3 (Packages)	Complexity:	
PHP Version:		Sprint Focus:	
Tags:			

Description

This will require changes to:

- Extension-archives (allow them to be signed)
 - either using an external signature (easier to integrate with current packages)
 - or using an internal signature (will require changes to package-format)
- Extension-manager (configuration/verification of signatures; optional per repository)
- Extension-repository (automatically sign packages uploaded to the official TYPO3-repository)

History

#1 - 2011-10-06 07:17 - Stefan Neufeind

This will help ensure that extensions (from the official repository or from a local repository) are unmodified. This will help validate integrity especially for the use of unsecure communication (http) or the use of (potentially unreliable) mirror-servers.

#2 - 2014-12-18 12:53 - Mathias Schreiber

- *Category set to Extension Manager*

#3 - 2015-01-08 14:41 - Mathias Schreiber

- *Target version set to 7.3 (Packages)*

#4 - 2015-01-08 14:42 - Mathias Schreiber

- *Status changed from New to Closed*

Taken into account in [#63909](#).

The issues are not linked on purpose, so the refactoring ticket does not get bloated with relations.
