Description

We have a design problem actually, the english XLIFF is actually a "en" to "en" translation file. We need to change this. English file must just be a template (as this is the default language). So we need to remove the target element from this file.

Subtasks:

Bug # 30917: Remove english project

Revision 440ee779 - 2011-10-18 15:40 - Dominique Feyer

[TASK] Add support for English XLIFF template files

Currently the XLIFF files provided with the Core are "en" -> "en" translation files, and this is a wrong design.

English XLIFF files must be template files (XLIFF files without target element) and as such, the parser needs to be adjusted not to return an empty label.
