

TYPO3.Flow - Feature #310

Find a way to simplify setter injection in ActionController (and elsewhere)

2008-02-14 16:13 - Robert Lemke

Description

Currently we need to write a setter method for all dependencies of an ActionController. The constructor can't be used for DI because it is needed by the base class.

This is a very tedious and repetitive task which could be simplified by just declaring the dependency and get them setter injected automatically.
