TYPO3.Flow - Bug #31294

SkipCsrfProtection doesn't work for actions without parameters anymore

2011-10-25 21:32 - Martin Brüggemann

Status:	Closed		**Start date:**	2011-10-25
Priority:	Must have		**Due date:**	
Assignee:	Karsten Dambekalns		**% Done:**	100%

Target version:	1.1 beta 1			
PHP Version:			**Complexity:**	
Has patch:	No			

Description

I tried to use the @FLOW3\SkipCsrfProtection with the following indexAction:

```
    /**
     * List action for this controller.
     * @return string
     * @FLOW3\SkipCsrfProtection
     */
    public function indexAction() {

    }
```

Unfortunately this doesn't work anymore. It works again if I add a dummy parameter like this:

```
    /**
     * List action for this controller.
     * @return string
     * @FLOW3\SkipCsrfProtection
     */
    public function indexAction($bernd = 'katze') {

    }
```

Maybe it's a small fix to change FLOW3s @DoctrineAnnotation\Target in Annotations\SkipCsrfProtection.php from "METHOD" to "PROPERTY" like this:

```
<?php
namespace TYPO3\FLOW3\Annotations;

/*                                                                           *
 * This script belongs to the FLOW3 framework.                              *
 *                                                                           *
 * It is free software; you can redistribute it and/or modify it under       *
 * the terms of the GNU Lesser General Public License, either version 3      *
 * of the License, or (at your option) any later version.                    *
 *                                                                           *
 * The TYPO3 project - inspiring people to share!                           *
 *                                                                          */

use Doctrine\Common\Annotations\Annotation as DoctrineAnnotation;

/**
 * @Annotation
 * @DoctrineAnnotation\Target("PROPERTY")
 */
final class SkipCsrfProtection {}

?>
```

But I'm not deep enough into this annotation stuff to imagine any side effects :)

History

#1 - 2011-10-26 09:20 - Karsten Dambekalns

- Status changed from New to Accepted

The target annotation declares the annotation target, and that is clearly method in this case (as the annotation is to be added in a method's docblock). So there must be something else.

#2 - 2011-11-11 15:30 - Martin Brüggemann

I updated my FLOW3 Package to the latest trunk and everything works fine now. You can close this ticket. Don't know exactly what has fixed the error but @FLOW3\SkipCsrfProtection works, now!

#3 - 2011-11-11 15:38 - Karsten Dambekalns

- Status changed from Accepted to Closed

- % Done changed from 0 to 100

Great!

#4 - 2011-12-21 12:38 - Karsten Dambekalns

- Target version changed from 1.1 to 1.1 beta 1
