

TYPO3 Core - Bug #32030

Pagebrowser wrong result count

2011-11-23 14:17 - Christian Sonntag

Status:	Closed	Start date:	2011-11-23
Priority:	Must have	Due date:	
Assignee:		% Done:	0%
Category:	Indexed Search	Estimated time:	0.00 hour
Target version:		Complexity:	
TYPO3 Version:	8	Is Regression:	No
PHP Version:	7.0	Sprint Focus:	
Tags:			
Description			
The pagebrowser has a wrong behaviour on the result page.			
For example results page 1: 0-20 of 150			
For example results page 2: 21-40 of 145 <=?			
For example results page 3: 41-60 of 142 <=?			
Is it a configuration bug or a bug in the extension?

History

#1 - 2013-01-21 12:30 - Florian Scholz

This may help ...

```
plugin.tx_indexedsearch {
  search {
    exactCount = 1
  }
}
```

#2 - 2013-03-27 14:16 - Oliver Hader

- Target version set to 2222

#3 - 2013-03-27 14:17 - Oliver Hader

- Project changed from Indexed Search to TYPO3 Core

#4 - 2013-03-27 14:19 - Oliver Hader

- Category set to Indexed Search

#5 - 2013-03-27 14:19 - Oliver Hader

- Target version deleted (2222)

#6 - 2013-03-28 11:05 - Michael Stucki

- Status changed from New to Accepted

- TYPO3 Version set to 6.0

Just got informed about the same issue last week. Afaik it only occurs while exactCount is turned on.

#7 - 2013-10-10 14:51 - Christian Drath

I can confirm this issue in 4.5.17 and 4.5.27. The configuration mentioned in [#1](#) solved the problem in both cases.

#8 - 2015-01-18 23:04 - Mathias Schreiber

- Status changed from Accepted to Closed

- Is Regression set to No

#9 - 2017-09-12 13:17 - Manuel Bachl

- TYPO3 Version changed from 6.0 to 8

- PHP Version set to 7.0

Issue is still present in TYPO3 8.7.4

the possible workaround mentioned in [#1](#) doesn't work. Tried setting the setting to 0 and 1.

#10 - 2017-09-12 14:30 - Tommaso Liberio

i am running in the same issue.

solved the problem by using following TS:

```
plugin.tx_indexedsearch {
  settings{
    exactCount = 1
  }
}
```

And not as [#1](#)

```
plugin.tx_indexedsearch {
  search{
    exactCount = 1
  }
}
```

#11 - 2017-09-12 17:49 - Michael Stucki

Hey everyone,

it's 4 years ago since I replied here last time, so I can't remember why I didn't mention the obvious thing:
It's a known issue that the count gets more precise with every additional result that has been checked.

For example, if a result contains your search words, but it is on a page which is not accessible for you, then it is counted until TYPO3 really checks the record.

By default, the counting stops when TYPO3 has collected all items to show for you. For example, when you're on page 1 of a 15 page result list, then results 11-150 will not be checked. While you click through the pagebrowser, more results will be checked, and the result count may become smaller with each page.

Like I said, that is a known behaviour (even Google handles result counting in a similar way). If you don't like it, then you can turn on the exact count feature (always check all results) at the cost of your performance...

I suggest to close the issue.

#12 - 2017-09-12 17:58 - Michael Stucki

Oh and btw. I think Tommaso has a point about the property name.

The real issue here seems to be that it is documented wrong, see

https://docs.typo3.org/typo3cms/extensions/indexed_search/Configuration/TypoScript/Index.html?highlight=exactcount

#13 - 2017-09-13 09:28 - Tommaso Liberio

i just checked the template analyzer to get the right property. But i think they should change it in the documentation.
