Target version:	4.7.0-alpha3	Complexity:	
PHP Version:		Sprint Focus:	
Tags:			

Description

Based on [#30645](#) the cardlayout should be introduced with a new approach.
The Cardlayout should be used for native modules only - as discussed in the very first version long before 4.6!

#20 - 2012-02-08 07:01 - Stanislas Rolland

How it this supposed to be tested and what are the expected results?

Why does the test extension conflict with rtehtmlarea?

#21 - 2012-02-08 07:41 - Kay Strobach

- File cards__3_.zip added

hello stanislas,

please ignore the conflicts, they are included, because i used another extension emconf to not start completely from the scratch - so i missed to exclude these lines - sry.

I uploaded a new version which has a changed ext_emconf.php

Thanks in advice
Kay

#22 - 2012-02-08 16:41 - Stanislas Rolland

What should be tested then? What are the expected results?

#23 - 2012-02-09 08:11 - Kay Strobach

- File 09-02-2012_07-51-47.png added

The Extension uses the patch and adds 2 modules to your module menu -> see attached image

The testers should check, wether their backend works as expected (module switching) ,...
