**Description**

In the file Packages\Framework\TYPO3.FLOW3\Classes\Security\Aspect\PersistenceQueryRewritingAspect.php line 374 is

```
eval('$globalObject = ' . $this->globalObjects[$objectAccess[1]]);
```

but should be something like

```
$className = '\\ ' . $this->globalObjects[$objectAccess[1]];
$globalObject = new $className;
```

or in the policy.xml the securityContext is not available, for example

```
resources:
  entities:
    Habex_Library_Domain_Model_Book:
      Habex_Library_OwnBooks: this.owner == current.securityContext.party
```

Even then the current.securityContext seems not to be available.

I think, that the test also need some update, I expects, that in Settings.yaml stands something like new SecurityContext();, what was maybe once like that.
