Description			
Instead of:			
<pre>Generated new migration class to ...</pre>			
the command output should read something like:			
<pre>Generated new migration class!</pre>			
Next Steps:			
<pre>- Move ... to YourPackage/Migrations/MySQL/ - Review and adjust the generated migration. - (optional) execute the generated migration using ./flow3 doctrine:migrate</pre>			
As this is much more understandable, and less error-prone, especially to new users.

[BUGFIX] (Command): Improve explanations of doctrine:migrationgenerate

Instead of:

```
Generated new migration class to ...
```

the command output now reads like:

```
Generated new migration class!
```

Next Steps:

- ```
- Move ... to YourPackage/Migrations/MySQL/
- Review and adjust the generated migration.
- (optional) execute the migration using ./flow3
 doctrine:migrate
```

This is much more understandable, and less error-prone, especially to new users.
