

## TYPO3 Core - Bug #32775

### Date-Picker does not hide in IRRE Elements

#### Description

Hi,

if there are datetime fields within IRRE (e.g. datetime field in powermail or any datetime field in a custom extension) the datepicker stays open if one clicks the calendar more than once.

- Open a IRRE Element which contains a datetime field
- Click calendar icon => datepicker pops up
- Click to an area outside => closes the datepicker
- Click calendar icon again => datepicker opens up again
- Click to an area outside or select a date => datepicker remains open and cannot be closed anymore

If there are more than one datetime field multiple datepickers will stay open.

There is no JavaScript error => Testet with Firefox 8.0 and Typo3 4.5.8

FYI: One year ago there was another issue with datepicker in IRRE, see [#22796](#).

Kind regards,  
Andreas

Thanks for your report, Andreas! I can confirm this issue.

Do you have a solution for that issue? I'm not a JS guru and have no time ATM.

Steffen

Hello Steffen,

Steffen Gebert wrote:

Unfortunately not. I digged a little bit through the JS-Code, but as there are so many JS-Files loaded in the Backend and no obvious JS-error is thrown I do not really know where to start debugging.

It would be great if someone who is familiar with the date pickers code could throw an eye on this issue.

Andreas

##### #3 - 2012-11-18 01:20 - Andreas Kiessling

Seems to be fixed with [#23843](#) which removes the event from the datepicker before adding them (again). I had the same issue a while ago, but could

not reproduce them now anymore.

```
datepicker.removeAllListeners();  
datepicker.on('click', function(){  
    menu.show(datepicker);  
});
```

Shouldn't such events be delegated to the form or body element, instead of being constantly removed and added?

Hi Andreas,

I've just tried in a 4.5.25 installation. `datepicker.removeAllListeners()`; is included in this version, but the problem still exists. The datepicker closes only the very first time (either by selecting a date or by clicking outside).

Andreas

#### #5 - 2014-12-14 10:05 - Mathias Schreiber

- Category set to 978

- Assignee set to Benni Mack

- Is Regression set to No

Benni, will this be fixed with the new datepicker?

#### #6 - 2015-02-02 21:43 - Mathias Schreiber

- Status changed from Accepted to Resolved

fixed on master

#### #7 - 2015-02-02 21:51 - Andreas Dörler

Hi Mathias,

Mathias Schreiber wrote:

this is good to hear.

Could you provide a link to the commit on github? I'd like to check if it's possible to backport the patch to TYPO3 CMS 4.5.

Thank you

Andreas

#### #8 - 2015-02-03 07:42 - Benni Mack

Hey,

I doubt this can be backported to 4.5, but here you go:

<https://git.typo3.org/Packages/TYPO3.CMS.git/commit/6782a7e05e536ec20ae32fd24a491d65919adab7>
