Fluid:

- Added Inline ViewHelper Syntax (resolves #3295)

##### Revision 2244 - 2009-05-16 11:36 - Sebastian Kurfuerst

Fluid:

- Added Inline ViewHelper Syntax (resolves #3295)

#### History

##### #1 - 2009-05-15 22:24 - Sebastian Kurfuerst

Reason why we do shorthand syntax to call viewhelpers: `<a href="{f:uri(action='...')}" class="" >`

This will be allowed: `{f:link("Hello {f:format.date()} world" action="greet")}`

Things with multiple lines will not be allowed (we want to enforce people to use XML-based syntax in this case: `{f:link("Hello`

```
{f:for}
world"
action="greet")}
```

The unnamed parameter, if it exists, has to be the first one. `{f:link("Hello Guys" action="greet")}`

We accept the following line, though it is really ugly as hell  
`<!-- Bad, but allowed --> {f:for("{singlePost}" each="{post}" as="singlePost")}`

We call this syntax  
INLINE NOTATION!!!!

##### #2 - 2009-05-16 11:37 - Sebastian Kurfuerst

- Status changed from New to Resolved

- Assignee set to Sebastian Kurfuerst

- % Done changed from 0 to 100

:-) :-) :-)

Thanks for the great discussions at the coding night
