Target version:		Complexity:	
PHP Version:			
Has patch:			

Description

If a class containing a route part handler is changed, we also need to flush the routes cache because other routes might match now.

Associated revisions

Revision 98343cbb - 2009-05-28 11:23 - Robert Lemke

For the FLOW3 distribution added a sub route to the Welcome package subroutes. If the Welcome package is installed, its fallback route becomes active and displays a meaningful welcome screen.

- FLOW3: (MVC) For now disabled the caching of routes because they can lead to confusion during development. We can enable caching again once the routes cache is automatically flushed. Refs #3306
- FLOW3: (MVC) The Router will now produce a log entry if no route matched.

Revision 2437 - 2009-05-28 11:23 - Robert Lemke
