

scriptmerger - Bug #33270

LF characters not replaced by line feed

Description	
Hi,	
Since version 3.2.4, "LF" characters are used in class.tx_scriptmerger.php file when self concatenating \$mergedContent variable, instead of "\n" in previous versions.	
On our TYPO3 4.3 instance, running over PHP 5.2.6, these characters are not replaced by line feed, so they appear as plain text in source code.	
Is it due to some missing PHP configuration ?	

History

#1 - 2012-06-19 16:58 - Stefan Galinski

- Target version changed from 3.2.4 to 3.3.0

#2 - 2013-05-15 23:59 - Stefan Galinski

- Status changed from New to Needs Feedback

- Target version changed from 3.3.0 to 3.x

TYPO3 4.3 isn't supported anymore with the next version. Does this still occur with TYPO3 4.5 or newer?

#3 - 2014-02-10 20:39 - Stefan Galinski

- Status changed from Needs Feedback to Closed

- Target version deleted (3.x)

#4 - 2014-02-27 04:01 - Evita Strupp

I'm usually to running a blog and i actually admire your content. The article has actually peaks my interest. I'm going to bookmark your web site and preserve checking for brand new information [blog posts](#)
