**Description**

The BACK_PATH is a known thing in TYPO3, used to define the relative path to the TYPO3 main directory (./typo3/).
Since this setting is static and strict, it would be nice to finally get rid of it and have a dynamic way to the determine the relative paths to be walked.

Examples:
t3lib_utility_Path::resolveBackPath(PATH_t3lib)
t3lib_utility_Path::resolveBackPath(PATH_typo3)
t3lib_utility_Path::resolveBackPath(t3lib_extMgm::extPath('myext') . 'Resources/'):
