Description

Hi,
when I try to update an extension, in the Extension manager, comes the following error:

Fatal error: Class tx_dbal_em contains 1 abstract method and must therefore be declared abstract or implement the remaining methods (tx_em_Index_CheckDatabaseUpdatesHook::appendTableDefinitions) in /html/typo3/typo3conf/ext/dbal/class.tx_dbal_em.php on line 384

Could you please resolve this error. For questions just contact me.

Best regards
Georg Bez

Xavier, would you like to take a look?

#2 - 2012-02-23 13:51 - Georg Bez

Excuse me, I again demand.
Please have a look at this problem once. Otherwise I fear that with the updates on what's still broken.
Here's a screen shot.

#3 - 2012-02-23 23:01 - Stefan Galinski

You installed the extension locally and doesn't use the provided version from the TYPO3 core? Does this problem still occurs if you remove the locally installed version in favor of the system version?

#4 - 2012-02-27 22:32 - Xavier Perseguers

- Status changed from New to Needs Feedback

The official tx_dbal_em class implements all 2 methods of the interface.

#5 - 2012-03-01 15:28 - Georg Bez

I want to apologize. An obsolete extension of dbal (v1.2.0) has superimposed on the system extension.
This for me was not at first apparent.
Again sorry and please close this.

Best regards,
Georg
