

TYPO3.Flow - Bug #34048

ResolveValidator breaks on DateTime method arguments

2012-02-17 18:42 - Kira Backes

Status: Closed	Start date: 2012-02-17
Priority: Must have	Due date:
Assignee: Bastian Waidelich	% Done: 0%
Category: Validation	Estimated time: 0.00 hour
Target version: 1.0.5	Complexity:
PHP Version:	
Has patch: No	

Description

When a dateTime argument is set in a method the ResolveValidator breaks, he tries to create a DateTime (instead of a validator)

Fixable by the following:

Change \TYPO3\FLOW3\Validation\ValidatorResolver::resolveValidatorObjectName (line 278)

```
if ($this->objectManager->isRegistered($validatorType)) {
```

to

```
if ($this->objectManager->isRegistered($validatorType) &&  
    $this->reflectionService->isClassImplementationOf($this->objectManager->getClassNa  
meByObjectName($validatorType),  
    'TYPO3\FLOW3\Validation\Validator\ValidatorInterface')) {
```
