

TYPO3.Flow - Bug #34408

CollectionValidator goes in endless recursion

2012-02-29 10:24 - Pankaj Lele

Status: Closed	Start date: 2012-02-29
Priority: Should have	Due date:
Assignee: Karsten Dambekalns	% Done: 0%
Category: Validation	Estimated time: 0.00 hour
Target version: 1.1	Complexity:
PHP Version: 5.3	
Has patch: No	
Description This is a case when 2 domain objects are associated with ManyToMany relation. If the owning side object is created/updated/deleted via ActionController the page load hangs and after few minutes it goes out of memory. I imagine Post m:n Tags, when Post is created the Post::tags property is validated with CollectionValidator then it again tries to validate Tag::posts property and goes in recursion.	
Related issues: Is duplicate of TYPO3.Flow - Bug #34154: ObjectValidator has exponential grow... Resolved 2012-02-21
