<b>Description</b> In the Info-Module -> "Pagetree overview" the displayed fields/columns are not configurable. I think it would be useful if one could add more fields just like in the extended list view of the list module.  (class tx_cms_webinfo_page / function generateList of class recordList)

This one has been solved with [#83449](#) - I think I can close it for now.

If you think that I have misunderstood it or that it should be reopened, please reopen it or ping me.

Thank you.
