**Description**

hi all,

I named an attribute "order" in my model and thus ran into problems running `./flow3 doctrine:update`, since it was not escaped and then treated as MySQL command.

Here is the Error:

Uncaught Exception  
SQLSTATE<sup>42000</sup>: Syntax error or access violation: 1064 You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'order position INT DEFAULT NULL' at line 1

**Related issues:**

Is duplicate of TYPO3.Flow - Bug #33639: Error in mySQL Statements with colum...	<b>Rejected</b>	<b>2012-02-02</b>
