Description

In TYPO3\FLOW3\Session\Aspect\LoggingAspect , l. 68

```
$reason = $joinPoint->getMethodArgument('reason') ?: 'no reason given';
```

there should be another check like "\$joinPoint->hasMethodArgument("reason")" or something like that.

The argument "reason" does not exist in method TYPO3\FLOW3\Session\PhpSession->destroy

```
25 TYPO3\FLOW3\AOP\JoinPoint::getMethodArgument("reason")
```

```
24 TYPO3\FLOW3\Session\Aspect\LoggingAspect_Original::logDestroy(TYPO3\FLOW3\AOP\JoinPoint)

[BUGFIX] Session: Do not throw an exception at logging

While logging the session destruction there was an exception thrown if no reason was given, because getArguments() can not be called for non existing arguments

Also added a testcase for the LoggingAspect.

Additionally removed the type hint for the proxy object in JoinPoint - although that's correct, it imposes unnecessary hassle for testing, like in this case.
