Description			
From IRC: after deleting the welcome package i get strange subroutes for e.g. documentation "http://flow3-alpha1.local/%3Cwelcomesubroutes%3E?packageKey=FLOW3&documentationName=Manual&language=en&%40action=index&%40controller=Standard&%40package=DocumentationBrowser"

History

#1 - 2009-06-02 20:27 - Bastian Waidelich

- Category changed from MVC to Configuration
- Target version changed from 283 to 1.0 alpha 2

That's actually an issue with the Configuration Manager - It skips routes that reference non existing subroutes, but it should throw an exception..

#2 - 2009-06-02 22:44 - Bastian Waidelich

- File *FLOW3_Subroute_placeholders_appear_in_URL_if_no_replaced_3537.patch* added
- Status changed from Accepted to Needs Feedback
- Assignee changed from Bastian Waidelich to Robert Lemke

See attached patch - That should be all there is to change in order to fix the bug.
But I couldn't get the systemLogger injected.. It probably needs some setup in Objects.yaml..

#3 - 2009-06-24 12:09 - Karsten Dambekalns

- Status changed from Needs Feedback to Accepted
- Assignee changed from Robert Lemke to Karsten Dambekalns

Thanks for the patch, it solves the issue.

Injecting a logger into the configuration manager is impossible, as the configuration is needed to build the logger to be injected...

#4 - 2009-06-24 13:00 - Karsten Dambekalns

- Status changed from Accepted to Resolved
- % Done changed from 0 to 100

Applied in changeset r2643.
