

TYPO3.Flow - Feature #3587

Enforce validation rules for value objects already in constructor

2009-06-05 11:21 - Robert Lemke

Status: New	Start date: 2009-06-05
Priority: Could have	Due date:

Category: Validation	Estimated time: 0.00 hour
Target version:	Complexity:
PHP Version:	
Has patch:	
Description Because the values of a value object can't be changed after instantiation, we should assure that only valid value objects exist. This should be done by validating the constructor arguments already in the constructor. The validation mechanism should be introduced by some aspect (@around the constructor) and throw an exception if validation fails.
