Description

If 'displayErrors' is set to 1 in Install Tool a PHP notice may lead to an Uncaught TYPO3 Exception:

```
Uncaught TYPO3 Exception
```

```
Class t3lib_FlashMessage does not exist
```

```
ReflectionException thrown in file
```

```
/www/htdocs/xxx/typo3_src-4.7.0rc1/t3lib/class.t3lib_div.php in line 4844.
```

```
30 ReflectionClass::__construct("t3lib_FlashMessage")
```

```
/www/htdocs/xxx/typo3_src-4.7.0rc1/t3lib/class.t3lib_div.php:
```

```
04842:     array_shift($constructorArguments);
```

```
04843:
```

```
04844:     $reflectedClass = new ReflectionClass($finalClassName);
```

```
04845:     $instance = $reflectedClass->newInstanceArgs($constructorArguments);
```

```
04846:     } else {
```

```
29 t3lib_div::makeInstance("t3lib_FlashMessage", "PHP : Assigning the return value of new by refer  
en...
```

```
...
```

This behaviour also occurs in TYPO3 version 4.7.

History

#1 - 2012-05-07 12:34 - Martin Bless

Confirmed for 4.5.15!

#2 - 2012-05-07 15:13 - Markus Klein

Please consider cleaning typo3temp/Cache/Code in order to renew the autoloader cache and tell us, whether this solved the issue. Thanks.

#3 - 2012-05-09 10:38 - Ulfried Herrmann

Dear Markus,

I tried to reproduce this exception to test your suggestion - unfortunately without success at present. But I dimly remember the try to do this (and the exception remained), but I'm not sure.

Ulfried

#4 - 2012-05-09 10:55 - Markus Klein

So is this still an issue or not?

I'm a bit confused atm.

#5 - 2012-05-10 08:45 - Ulfried Herrmann

Dear Markus,

since I actually head this exception and Martin could confirm it I think it's still an issue. I'll keep trying to reproduce the behaviour in next days to tell you the preconditions for traceability.

Best
Ulfried

#6 - 2012-06-06 08:40 - Simon Apold

Confirmed for 4.7.1 on my local dev environment (Win7 - XAMPP)
The error message appears in the workspace module.
Cleaning typo3temp/Cache/Code does not solve this Problem.

On our test machine (Linux) the workspace module shows a different error message (Class t3lib_lock does not exist).

#7 - 2012-06-12 11:42 - Noel Bossart

I can confirm this issue on multiple instances of the same website (multiple servers) \$TYPO3_CONF_VARS['SYS']['displayErrors'] = '0'; solves the problem.

WorkSpaces
router Class t3lib_FlashMessage does not exist

#8 - 2012-07-16 16:17 - Michael Bakonyi

I can confirm this issue for 4.7.2

#9 - 2012-08-15 11:07 - Philipp Wintermantel

Michael Bakonyi wrote:

Also confirmed for 4.7.2.

In my case the error is caused by the fpdf extension which uses deprecated reference assigning. The error seems to be triggered when the errorHandler tries to collect PHP deprecated warnings.

Probably related to [#23444](#)

It really looks like the t3lib_FlashMessage class isn't available, because the autoloader isn't initialised, while a message should be shown.

Could you give it a try and add

```
require_once (PATH_t3lib , 'class.t3lib_flashmessage.php');
```

to init.php for example here:

```
// *****  
// t3lib_div + extention management class included  
// *****  
require_once(PATH_t3lib.'class.t3lib_div.php'); // The standard-library is included  
require_once(PATH_t3lib.'class.t3lib_extmgm.php'); // Extension API Management library included
```

#11 - 2012-08-15 13:57 - Philipp Wintermantel

That would fix the issue indeed. Although the required classes must be included as well:

```
require_once (PATH_t3lib . 'message/class.t3lib_message_abstractmessage.php');  
require_once (PATH_t3lib . 'class.t3lib_flashmessage.php');
```

Maybe even class.t3lib_message_errorpagemessage.php and class.t3lib_message_abstractstandalonemessage.php. But AbstractMessage was sufficient for my scenario.

Thanks for looking into it :-)

Thanks Philipp! Works for me :-)!

#13 - 2012-09-13 08:44 - Ulfried Herrmann

I can confirm that the solution posted here solves the problem indeed.

As Philipp wrote the fpdf extension caused the error in my case too.

Thanks to all who contributed!

#14 - 2012-09-21 11:48 - Pascal Dürsteler

I also get this error when loading the external class [\[\[http://sourceforge.net/projects/phpexcelreader/\]\]](http://sourceforge.net/projects/phpexcelreader/) in a controller action.

Loading

```
require_once (PATH_t3lib . 'message/class.t3lib_message_abstractmessage.php');
require_once (PATH_t3lib . 'class.t3lib_flashmessagequeue.php');
require_once (PATH_t3lib . 'class.t3lib_flashmessage.php');
```

solves the problem.

#15 - 2012-10-01 18:45 - Andreas Mayer

Can confirm this bug for Typo3/4.7.4.

#16 - 2013-06-12 16:07 - Alexander Opitz

- Status changed from Needs Feedback to New

#17 - 2015-01-16 19:03 - Mathias Schreiber

- Target version set to 7.4 (Backend)

- Is Regression set to No

#18 - 2015-02-06 07:51 - Frederic Gaus

Unable to reproduce this on current master.

#19 - 2015-04-27 17:22 - Riccardo De Contardi
